WHAT WE DO

SaskTel International has been delivering software solutions to organizations for over twenty-five years. Our relationship with SaskTel, an innovative telecommunications service provider with over 100 years of history, enables us to understand and deploy solutions that are market-ready.

SaskTel International also has a world renowned ICT division, having worked in over 30 countries across six continents.

WHO WE ARE

Our leading-edge solutions cover not only service assurance, incident/request management, trouble ticketing and monitoring, we also provide solutions for inventory, provisioning, assignment, service order management, activation, along with integrated retail management, billing and customer relationship management. We provide a broad spectrum of consulting services utilizing highly skilled experienced professionals.

WHY YOU NEED TO TALK TO US

Customer Oriented: we are respected by our customers due to the close working relationships we have with them. We listen and deliver.

Expertise: we've been providing software solutions since 1985. You get market-ready solutions that are in operation with clients.

Scalable: big or small applications, our software solutions are scalable. Our clients range from very small in size to companies with thousands of employees.

OUR SOFTWARE PORTFOLIO

SaskTel International's MARTENS™ inventory and provisioning software allows service providers to overcome industry challenges through completely automated, flow-through provisioning for cable and telecom networks. Identify what resources are available and how they must come together to fulfill the requests of your customers.

SaskTel International's service order management and activation solution is equipped with an extensive portfolio of powerful features that automate and easily manage network and service activation activities. OpenSwitchGate provides real-time network element activation for telecom, wireless, cable, and broadband, and other communication networks. OpenSwitchGate can interact with virtually any network or device, making enabling services a seamless and instant process.

SaskTel International's service assurance and incident management solution dramatically enhances the efficiency of your repair service operations, enabling the creation of lasting customer relationships and the quick and effective resolution of troubles. Tracs instantly accesses timely, accurate, and detailed information so that you can efficiently administer and analyze trouble and repair records, trends, and patterns.

WHO WE ARE

Recognized as a global innovator and experienced-backed solution provider, SaskTel International has successfully enabled international clients to develop, enhance, and expand their business operations for over 25 years. From leading-edge software solutions to professional consulting and project management services, SaskTel International assists businesses globally in achieving their strategic business goals and objectives.

PROFESSIONAL CONSULTING

SaskTel International's work doesn't end with the product. We can also assist you with implementing and deploying the product, help you integrate it into your existing infrastructure, and provide expert consulting, ongoing support and training.
