SaskTel International ICT Consulting Services

What We Do

Our in-depth Telco operating experience spans such key areas as IPTV, Broadband, FTTX, NGN, VoIP, and various wireless technologies such as UMTS/HSPA+, GSM, WiMax, and CDMA, among others.

SaskTel International's ICT Consulting Services can provide a broad spectrum of consulting services including:

IPTV Consulting:

Our IPTV consulting services cover a wide variety of areas including:

- **Planning** – Strategy, Business Case Development, Implementation Plans, Project Management
- **Technical** – Technology Analysis, Architecture Design, RFP Support, Vendor Selection, Systems Integration
- **Operations** – Service Readiness and Operational Gap Assessments, Trial Support, Service Assurance & Monitoring
- **Business** – Content Acquisition, Contract Negotiations, Regulatory, Legal, Marketing & Sales

Wireless Consulting:

Expertise in UMTS/HSPA+, CDMA, GSM, WiFi, WiMax, EVDO and various other wireless technologies.

SaskTel International can provide a wide variety of services including planning, engineering, design, build, testing and operations.

Project Management:

Experienced, certified project managers for all your Telecom business needs, including IT, IPTV, wireless, Broadband and more.

Operational Consulting:

Establishing operational guidelines and procedures in the areas of customer care, service delivery and assurance, marketing and distribution.

Network Engineering:

Engineering expertise across all technologies and services including video, wireless, wireline, Broadband, and FTTX to name a few core areas.

Professional Services:

We can help our clients achieve their strategic business objectives by assisting with:

- IT professionals and expertise
- Business analysis
- Management contracts
- Investment due diligence
- Business case development
- Feasibility studies

Why SaskTel International

SaskTel International's key competitive differentiator is our ability to consult from a service provider's perspective. This advantage is based on our unique relationship with SaskTel, a very successful, independent, full service telecommunications company that has been operating and growing for more than 100 years.

SaskTel's position as an extremely successful, independent, "quintuple play" (wireline, wireless, broadband, IPTV & home security) telecommunications company, not bound to any specific vendor, allows SaskTel International to offer best in class, unbiased, advice and solutions to its customers from an actual operating Telco perspective.

Operating since 1986, SaskTel International has helped clients around the world develop, improve and expand their communications networks by exporting the in-depth skill and technical expertise of SaskTel and SaskTel International staff. The range of services we have provided has been as diverse as the countries we have worked in. SaskTel International has worked for private sector companies, governments and international financial institutions in over 60 countries across six continents.

From professional consulting and project management services to leading-edge OSS Solutions from our OSS Software Division, SaskTel International can help Service Providers globally to achieve their strategic business goals and objectives. We build honest relationships through open communication with all people interacting with our business – our customers, employees, partners and shareholders. We deliver excellence by acting with integrity when conducting business and by taking pride in and responsibility for our work and decisions. Working together we create an atmosphere of respect, treating others how we would want to be treated.
